5.8 Portfolio quality report

The Bank's main measure of loan delinquency is an aged portfolio-at-risk ratio. Loans are separated into classes depending on the number of days they are over-due. For each of such days of loan, the outstanding principal balance of such loan class is divided by the outstanding principal balance of the gross loan portfolio before deducting allowance for non-performing advances.

Loan payments are applied first to any interest due, then to any installment of principal that is due but unpaid, beginning with the earliest such installment. The number of days of delay is based on the due date of the earliest loan installment that has not been fully paid. Late payment surcharges/ penalty on overdue advances is not added to principal.
